Experience

Primeasia University

April, 2024 - Present

Web Developer, Intern

Projects

Primeasia University Website

- Led the creation of an advanced, user-friendly website for Primeasia University using PHP, Laravel, HTML, Bootstrap, CSS, and JavaScript, enhancing the institution's online visibility and engagement
- Designed and integrated a custom CMS, enabling administrators to easily update website content without requiring technical knowledge, thus ensuring the website remains current and relevant
- Focused on improving the website's loading speed and overall performance by implementing efficient coding practices, optimizing images and leveraging browser caching
- Addressed security concerns by implementing robust multi-user authentication protocols and strict adherence to best practices, safeguarding user data and maintaining the university's reputation

PHP, Laravel, MySQL, HTML, CSS, JavaScript

PenGUI Scriptor

🔗 <https://github.com/mechano59/Pengui-Scripter>

- Created a mobile app using Flutter and Dart to streamline the creation and editing of Bash scripts on mobile devices
- Implemented an intuitive Material UI, ensuring accessibility for users of all skill levels and enhancing user experience
- Enabled in-app script preview and editing functionality, allowing users to validate their scripts before saving or exporting them

Flutter, Dart, Bash

Discord Music Bot

🔗 <https://github.com/mechano59/DiscordBot-YaameteH>

- Created a multi-functional Discord bot using Python to enhance server management and user interaction, custom cog modules to organize and manage different bot functionalities, ensuring modularity and ease of maintenance
- Enabled music playback within the Discord server, utilizing Lavalink for audio streaming, before the feature was discontinued
- Integrated with YouTube and Reddit APIs to fetch and display content within the Discord server, enhancing user engagement with real-time data

Python, Flask
